

La ciencia es bella y es por esa belleza que debemos trabajar en ella, y quizás, algún día, un descubrimiento científico como el Radio, puede ser un descubrimiento que beneficie a toda la humanidad.

Formé parte del equipo que descubrió el elemento 91 (Protactinio) y la fisión nuclear. El elemento 109 fue nombrado Meitnerio en mi honor.

**MARIE CURIE**  
(1867 - 1934)

**LISE MEITNER**  
(1878 - 1968)

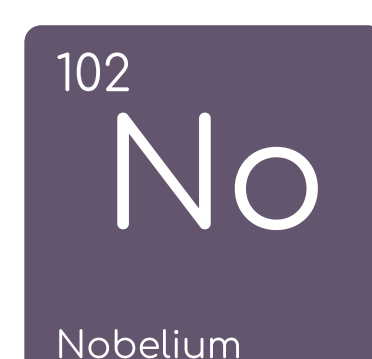

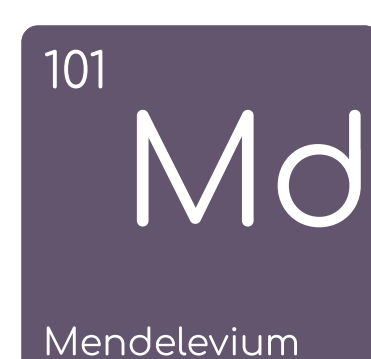

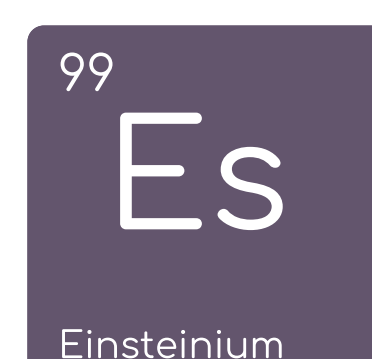

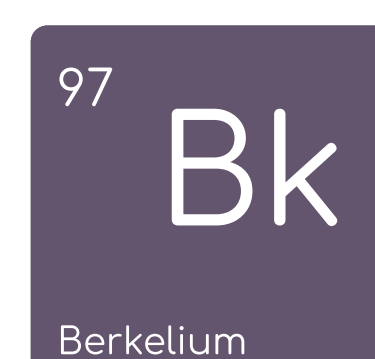

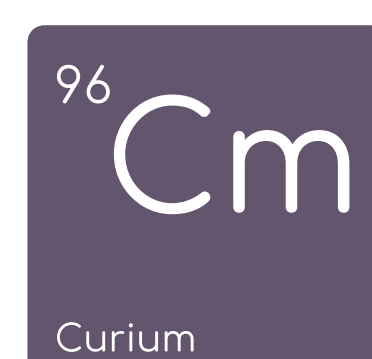

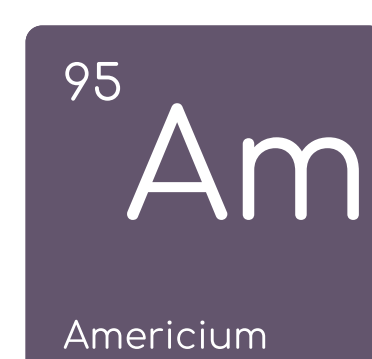

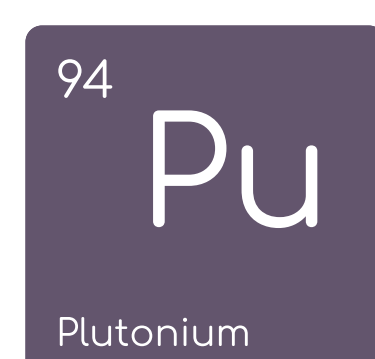

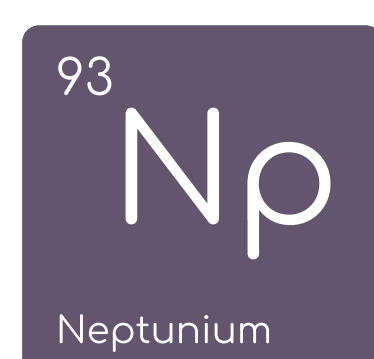

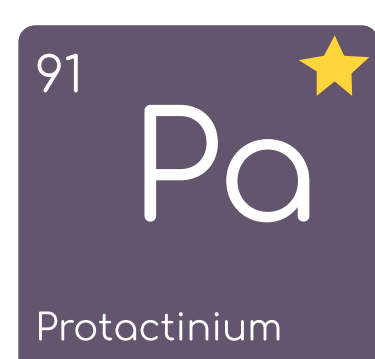

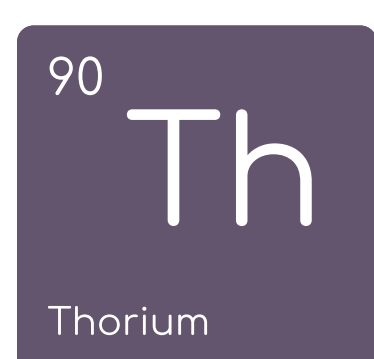

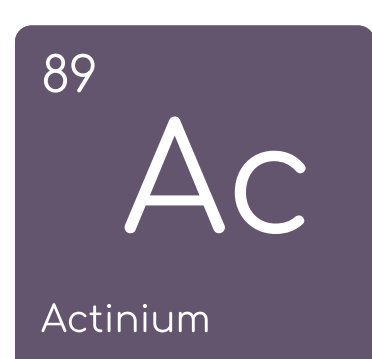

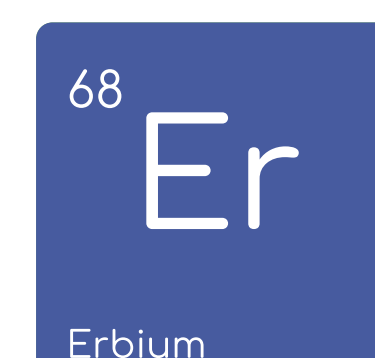

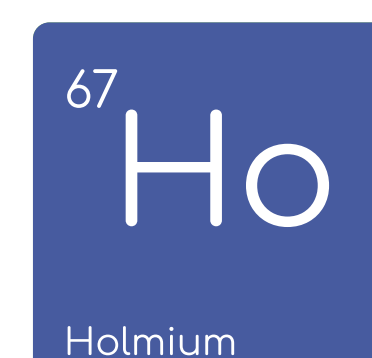

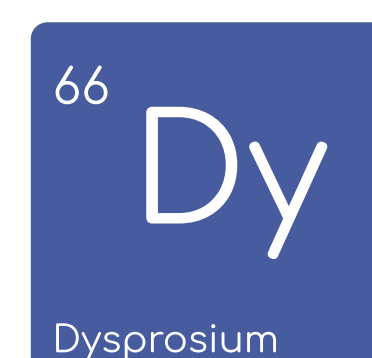

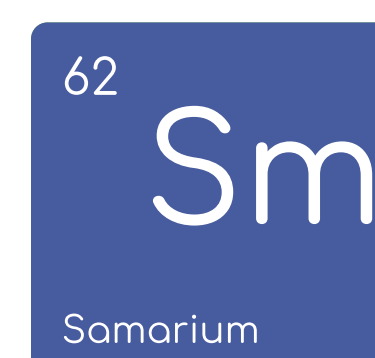

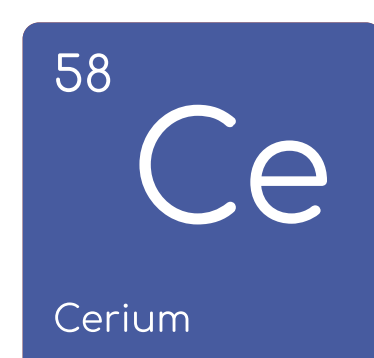

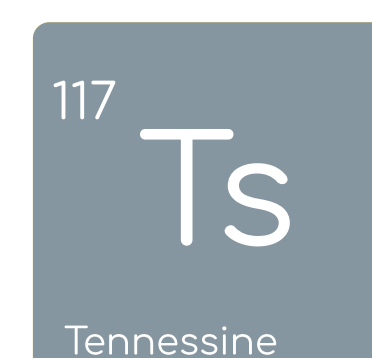

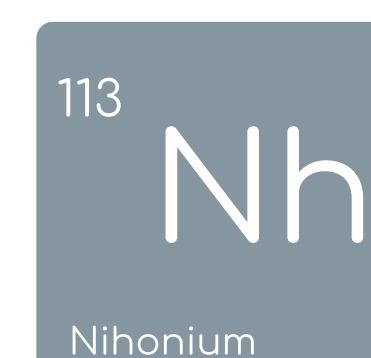

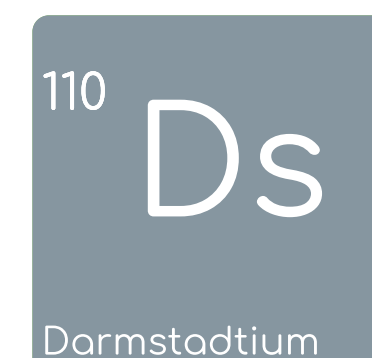

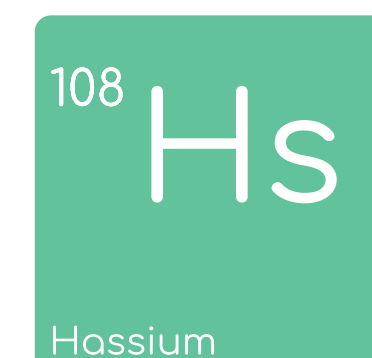

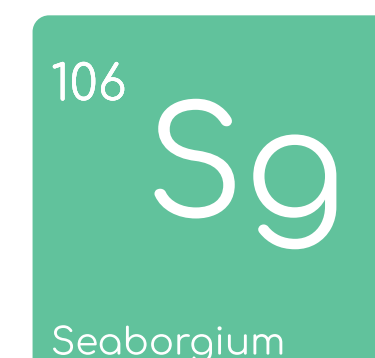

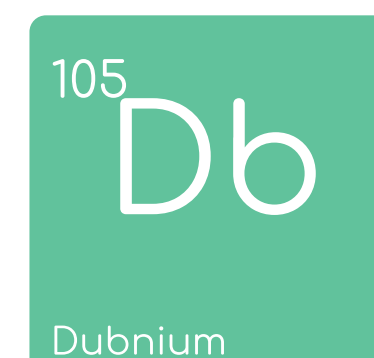

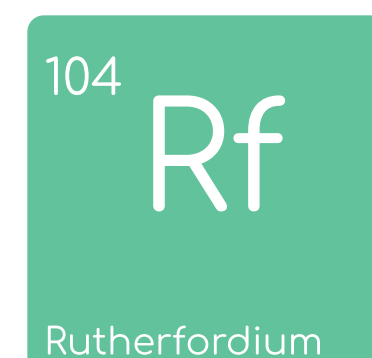

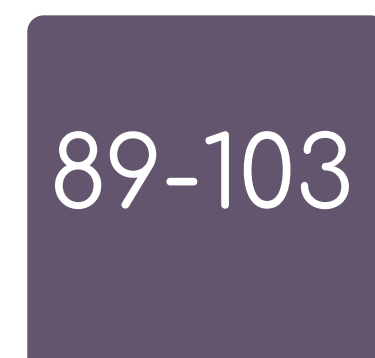

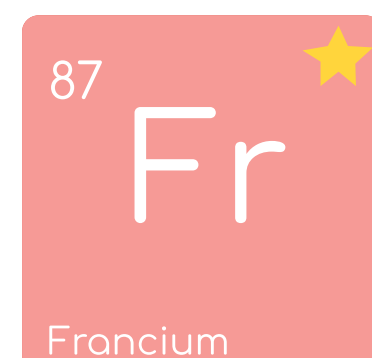

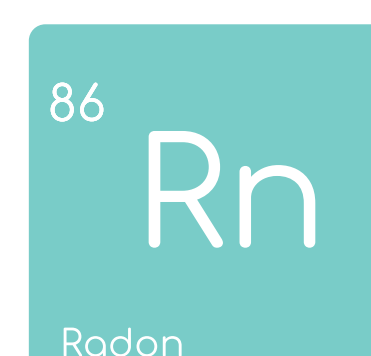

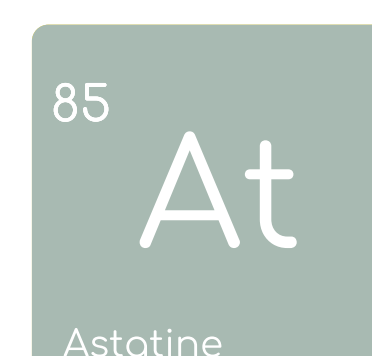

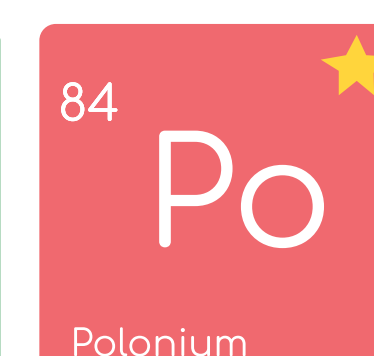

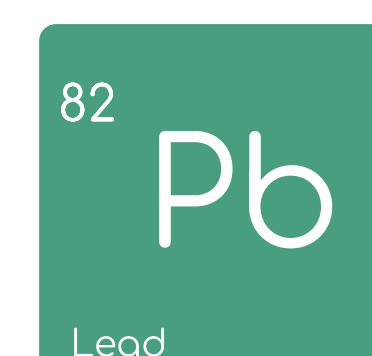

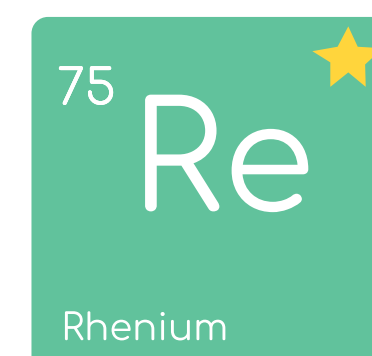

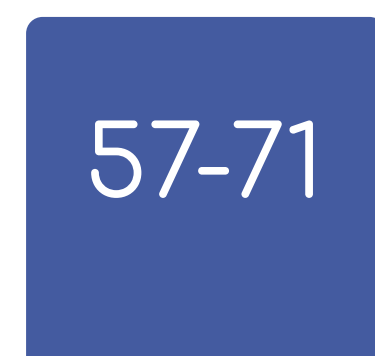

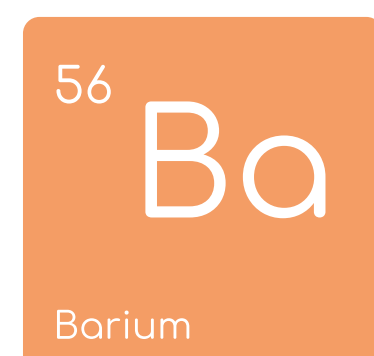

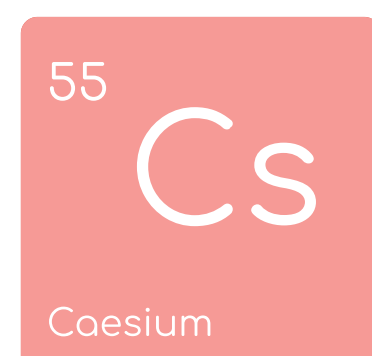

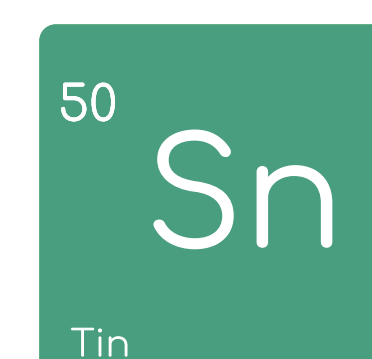

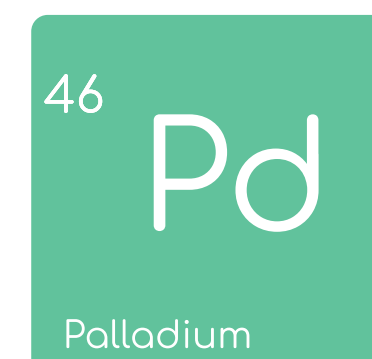

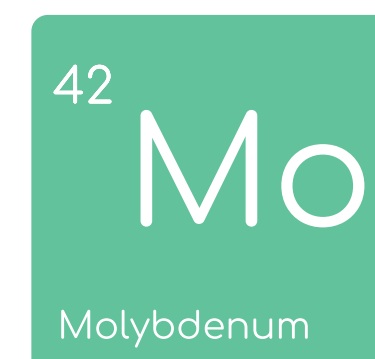

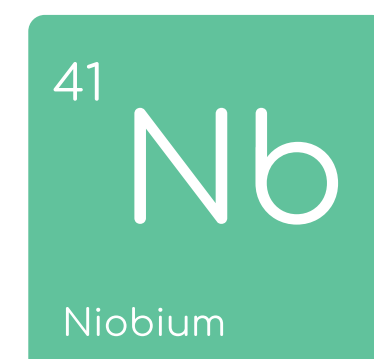

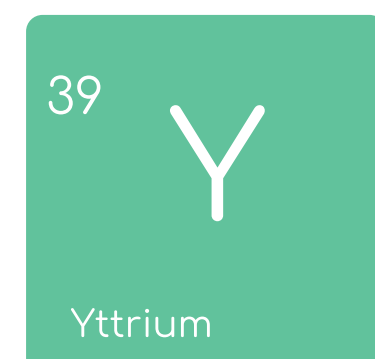

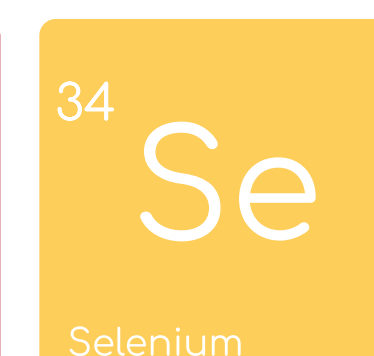

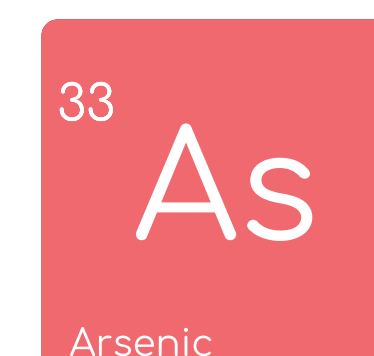

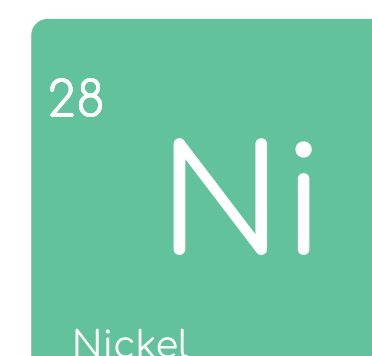

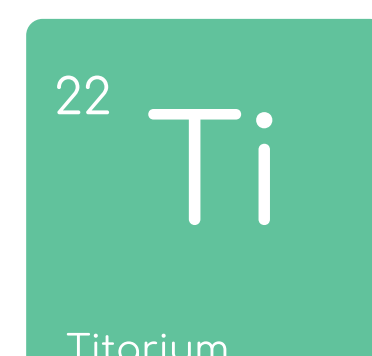

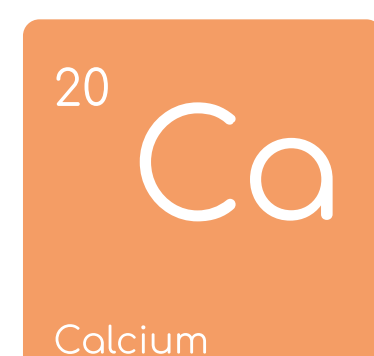

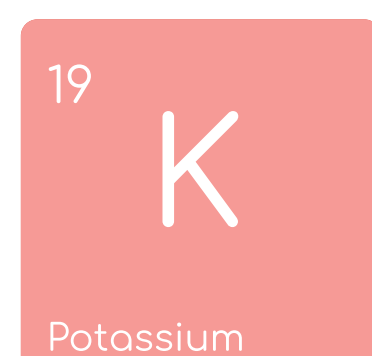

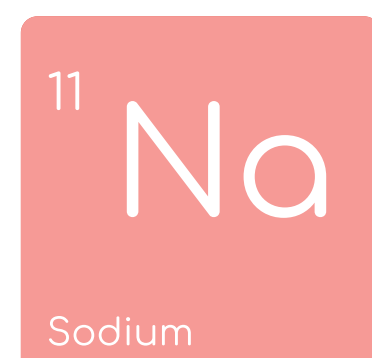

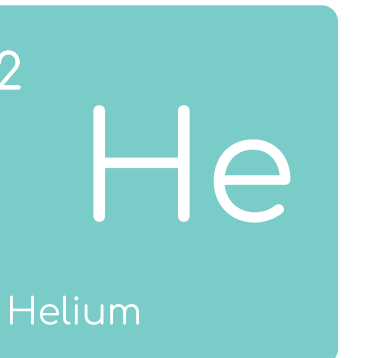

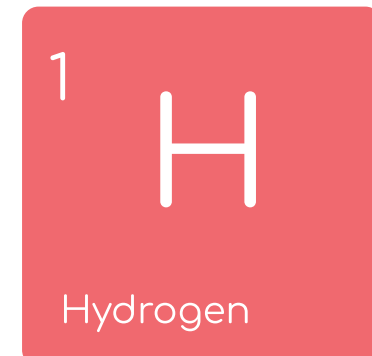

**IDA NODDOK**  
(1896 - 1978)

Trabajé en el laboratorio de Marie Curie. Ella llamó Polonio al elemento 84 en honor a su país. Yo descubrí el 87 y lo llamé Francio en honor al mío.

Walter Noddak, Otto Carl Berg y yo descubrimos el elemento 75 en minerales de las cercanías del Rin. En honor a ese río, lo llamamos Renio.

**MARGUERITE PEREY**  
(1909 - 1975)
